TECHNICAL SKILLSET

- REACT, VANILLA FRONT-END.
- MVC, AXIOS, JQUERY, BOOTSTRAP, TAILWIND, PRELINE, CHART.JS, ETC.
- PHP, MYSQL, POSTGRESQL, NODE, EXPRESS.JS
- VERSION CONTROL (GIT)

PERSONAL PROJECTS

- Portfolio
- E-commerce Store.
- Blog Platform.
- Chat Application.
- URL shortener.
- Colour Game.
- Database Module.
- MVC Stater Pack.
- House-Rental System.

CERTIFICATIONS

- Bachelor's in Engineering (In-view)
- Web Design/Development
- Database Management & Design.

SAMUEL U. BEN.

Web Developer (Full Stack)

MY STORY

Embarking on my tech journey in 2016, I delved into programming, mastering HTML, CSS, JAVASCRIPT, PHP and MySQL. Early projects, ranging from e-commerce to chatting website, showcased my creative and technical prowess. In 2022, I embraced Node.js, adding dynamism to my skill set. As a freelancer, I've applied these skills to diverse projects, implementation of MVC framework in PHP for efficient structures.

Simultaneously, my academic pursuits took root in 2017 when I was admitted in the University for a Bachelor's degree in Computer Engineering, following my 2016 completion of secondary school. This academic foundation, paired with hands-on experiences, has shaped my holistic understanding of technology's intersection with theory. Today, as I navigate new technologies (learning AI) and contribute to innovative projects, my commitment to growth in the ever-evolving tech landscape remains steadfast.

WORK EXPERIENCE

Freelancer, Nov 2022 - March 2023

- Implemented pixel-perfect UI designs using HTML5, CSS3, TAILWIND and Javascript.
- Ensured responsive design principles for optimal user experiences across various devices and also collaborated closely with UX/UI designers to translate mockups into interactive and visually appealing web interfaces
- Using MVC architecture on PHP in developing server-side logic, handling dynamic content generation and database handshakes. I also designed efficient databases for data storage and retrieval, alongside API implementation and integration of third-party services for payment and other services.
- Finally, I collaborated with cross functional teams, including developers and stakeholders, to ensure designs met both design and technical requirements.

Development of House Rental System

(School Project), University of Uyo, Nig.

- Implemented a responsive and intuitive UI, Forms and Modals using HTML, CSS, TAILWIND, and JavaScript for an enhanced experience across devices.
- Developed server-side logic using PHP, handling user authentication, post creation, and data storage, routing and enforced a secure data transmission through HTTPS protocols and approved methods (GET, POST, PUT, DELETE).
- Designed and implemented a MySQL database to store user information, and apartment details for efficient data retrieval and update to improve system performance.
- Enabled users to create detailed posts showcasing apartment information, including images, location and amenities.

SOFT SKILLS

- Communication.
- Adaptability.
- Result Oriented.
- Time Management.
- Collaboration.
